PROFESSIONAL SUMMARY

Data Analyst with a passion for turning raw data into actionable insights. Skilled in Excel, SQL, Python and Power BI, with hands-on experience in analytics, reporting, and automation. Eager to leverage data-driven solutions to fuel innovation and business growth in fast-paced environments.

CORE SKILLS

- Languages: Python (Pandas, NumPy), SQL
- Visualization: Power BI, Matplotlib, Seaborn, Plotly
- Analytics: Excel, Data Cleaning, Statistical Analysis
- Databases: MySQL, SQLite

PROJECTS

Maji Ndogo Water Crisis Analysis (with ALX Africa)

2025

Tools used: Spreadsheet, MySQL, Power BI

- Developed an interactive Power BI dashboard to analyze 200+ water source improvement projects across 5 provinces, tracking progress toward safe water access.
- Did a thorough analyses that ensured \$154M cumulative spend vs \$146M budget, reducing the cost overrun to a mere 5.3%.
- Compared urban vs rural project costs (\$3.97K vs \$7.31K) and evaluated vendor performance, surfacing opportunities for cost optimization and efficiency.

Flight Delay Analysis Dashboard (Personal)

2025

Tools used: Power BI, DAX, Power Query

- Built an interactive Power BI dashboard analyzing 5.8M U.S. flight records (2015) to evaluate airline, airport, and route performance.
- Designed a star-schema data model integrating Flights, Airlines, and Airports tables, and automated data cleaning using Power Query and DAX.
- Revealed that Los Angeles (LAX) had the most connecting routes, while San Francisco to Los Angeles was the busiest route (13,733 flights).
- Found Alaska Airlines as the best performer (avg. arrival delay of -1 min, 88% on-time arrival rate) and Spirit Airlines as the worst (avg. delay of 14 min, 71% on-time arrival rate).
- Identified June as the peak delay month (122K hrs), and Late Aircraft and Airline delays as the largest contributing causes of delays.

INTERESTS

- Data visualization & storytelling
- Business intelligence & automation tools
- Problem-solving puzzles (e.g., Sudoku, chess)
